PROFESSIONAL SUMMARY

Frontend Developer with hands-on project experience in HTML, CSS, JavaScript, and React.js. Skilled in building responsive interfaces, reusable components, routing, state management, and REST API integration. Currently pursuing BCA and seeking a Frontend Developer Fresher role.

Technical Skills

Languages: HTML5, CSS3, JavaScript (ES6+)

Frontend: React.js, React Router, Redux, Redux Toolkit (RTK)

Styling: CSS, Responsive Web Design

Concepts: REST APIs, State Management, Component-Based Architecture, Responsive UI Development

Projects

Component Vault — Frontend Code Snippet Manager

Live: https://componentvault.netlify.app/

- Built a client-side code snippet manager using React 19, Vite 8, and Monaco Editor for creating and editing JSX and CSS components.
- Implemented search, tag-based filtering, favourites, collections, and CRUD functionality with reusable React components and Context API state management.
- Added React Router v7 nested routing, localStorage persistence, URL search parameters, one-click code copying, and custom CSS design tokens.

Roster — HR Management Web Application

Live: https://roster-hrdesk.netlify.app/

- Built an HR management application using React and reusable components for employee, attendance, leave, holiday, and calendar workflows.
- Implemented client-side routing with React Router, protected routes, dynamic employee routes, and shared application state using Context API.
- Added localStorage persistence, reusable forms and modals, search/filter interfaces, and CSS-based dark theme support for the application.
